✦ Key Features

Product Overview

- › This starter kit includes 15+ modular n8n workflows with detailed setup guides, node configurations, and API integration templates. Each workflow is designed for drag-and-drop deployment.
- › ****Google Forms → Airtable Lead Capture**** – Auto-saves form responses to Airtable, enriches with Clearbit (name, company, role).
- › ****Facebook Lead Ads → HubSpot**** – Pulls leads from Facebook, checks for duplicates, creates/updates HubSpot contacts.
- › ****LinkedIn Profile Scraper → Google Sheets**** – Extracts public profile data (headline, location, company) into a sheet.
- › ****Email Parsing (IMAP) → CRM**** – Monitors a mailbox, extracts lead info from emails, pushes to Salesforce.
- › ****Welcome Email Sequence**** – Triggers on new lead: sends email 1 (Day 0), email 2 (Day 3), email 3 (Day 7) via SendGrid.
- › ****Abandoned Cart Recovery**** – Connects to Shopify API, sends reminder email sequence with discount code.
- › ****Webinar RSVP Follow-up**** – Sends confirmation, reminder, and replay link emails via SMTP.
- › ****Email Bounce Handler**** – Detects hard bounces from SendGrid webhooks, removes from active list.
- › ****HubSpot ↔ Salesforce Two-Way Sync**** – Syncs contacts, deals, and activities bidirectionally every 15 minutes.
